

NETAPP UNIVERSITY

Microsoft Exchange on NetApp Storage Systems

COURSE DESCRIPTION

This solution-based course focuses on the optimization of Microsoft® Exchange Server in a NetApp® storage environment. This course takes students through the entire systems-integration process of architecture planning, data migration, backup and restore, disaster recovery, and troubleshooting.

DELIVERY TYPE

Instructor-led training (ILT)

DURATION

3 Days

AUDIENCE

An administrator who is responsible for the integration process of architecture planning, data migration, backup and restore, disaster recovery, and troubleshooting Microsoft Exchange Server with NetApp storage system environments.

TUITION & TRAINING UNITS

- North America: \$2,250 per student (USD)
- International: \$2,250 per student (USD - Local taxes not included)
- Training Units: 30

PREREQUISITES

- Data Protection and Retention (ILT)
- Microsoft course 2400: Implementing and Managing Microsoft Exchange Server 2003
- Microsoft course 2011:Troubleshooting Microsoft Exchange Server 2003
- Microsoft Seminar: Microsoft Exchange Server 2003 Disaster Recovery

OBJECTIVES

At the end of this course you should be able to:

- Describe the benefits of running Exchange Server on a storage system.
- Describe the Exchange Server backup and restore process.
- Perform Exchange Server 2003 storage planning, implementation, and administration.
- Determine the correct NetApp storage controller model, volume size, and LUN size to support the solution.
- Perform data migration to and from a PC and a NetApp storage system.
- Back up and verify an Exchange Server data store using SnapManager® 3.2.
- Restore data using SnapManager 3.2.
- Describe different disaster-recovery methods.
- Implement a disaster-recovery method.
- Isolate and correct faults in an Exchange Server and SnapManager solution.
