FAS6000 Series Hardware Maintenance Update, Rev02

COURSE DESCRIPTION

The self-paced FAS6000 Series Hardware Maintenance Update course is designed for support personnel who are responsible for maintaining and troubleshooting the FAS6000 Series systems. This course provides information about the FAS6000 Series hardware components, field replaceable unit (FRU) replacement procedures, and system troubleshooting.

DELIVERY TYPE

- Web-based training (WBT)

DURATION

- 2 hours

AUDIENCE

Support personnel who are responsible for maintaining and troubleshooting the FAS6000 Series systems

TRAINING UNITS

- None

PREREQUISITES

- NetApp® Hardware Fundamentals (WBT)
- Recommended:
- Remote LAN Module (RLM) (WBT)

OBJECTIVES

By the end of this course you should be able to:

- Describe the FAS6000 Series system and identify major components
- Differentiate between the different models
- Replace FRUs on the FAS6000 Series system
- Load the boot image using the netboot procedure
- Assign disk ownership to the FAS6000 Series system
- Perform basic hardware troubleshooting and apply corrective action
- Use the RLM to perform system troubleshooting
