

NETAPP UNIVERSITY

DataFort Storage Security Administration

COURSE DESCRIPTION

This instructor-led course is designed for anyone who performs basic support and administration functions on a NetApp® DataFort storage security appliance or Lifetime Key Management™ Appliance. Through a combination of discussion and hands-on activities, this course describes the features and functions of the NetApp DataFort E-Series (network-attached storage [NAS] and iSCSI), FC-Series (storage attached network [SAN] disk and SAN tape), S-Series (SCSI tape), Lifetime Key Management Appliances and Data Decryption Software.

DELIVERY TYPE

- Instructor-led training (ILT)

DURATION

- 5 days

AUDIENCE

Anyone who performs basic support and administration functions on a NetApp DataFort storage security appliance or Lifetime Key Management Appliance

TRAINING UNITS

- 60

PREREQUISITES

- Knowledge of networking terminology and management
- Background in UNIX® or Windows® server administration

- Knowledge of SAN administration

OBJECTIVES

By the end of this course you should be able to:

- Explain basic security and encryption principles and how those apply to a storage security appliance
- Explain the features and functions of the NetApp DataFort platform including encryption key hierarchy and smart card operation
- Describe different architectures and deployment options for the NetApp DataFort storage security appliance and Lifetime Key Management Appliance
- Configure E-Series (NAS and iSCSI) and FC-Series (disk and tape) NetApp DataFort appliances for storage encryption
- Manage a NetApp DataFort storage security appliance and Lifetime Key Management Appliance using the Decru Management Console
- Decrypt data without a NetApp DataFort storage security appliance using Data Decryption Software
- Perform key sharing operations using the NetApp DataFort storage security appliances and the Lifetime Key Management Appliance
- Perform disaster planning for NetApp DataFort Storage Security appliance and Lifetime Key Management Appliance
