

NETAPP UNIVERSITY

Operations Manager 3.7, Protection Manager 3.7, and Provisioning Manager 3.7 Administration

COURSE DESCRIPTION

This instructor-led course is for administrators and support personnel who will use Operations Manager, Protection Manager, and Provisioning Manager software to back up and protect mission-critical data in the enterprise.

DELIVERY TYPE

- Instructor-led training (ILT)

DURATION

- 5 days

AUDIENCE

Administrators and support personnel who will use Operations Manager, Protection Manager, and Provisioning Manager software to back up and protect mission-critical data

TRAINING UNITS

- 60

PREREQUISITES

- Data ONTAP® Fundamentals (WBT)
- Introduction to NetApp® Products (WBT)

OBJECTIVES

By the end of this course you should be able to:

- Articulate the different components of the Operations Manager 3.7 data management suite
- Operate the core Operations Manager software suite and know its limitations
- Identify common problems with normal Operations Manager use and their remedies
- Configure hosts and Open Systems SnapVault® clients for use with Protection Manager
- Perform common tasks in Protection Manager such as add hosts, backup and restore data, manage resource pools, set up schedules, and more
- Explain user-defined Provisioning Manager policies and conformance checking and how to configure thin provisioning
- Explain third-party SNMP integration and Operations Manager role-based access control (RBAC) support into Performance Advisor
- Create custom performance views, alarms, and thresholds in Performance Advisor
