

NETAPP UNIVERSITY

High Availability on Data ONTAP 7.3

COURSE DESCRIPTION

This self-paced course is designed for NetApp® employees, service partners, and customers who implement active/active controller configurations, SyncMirror®, and MetroCluster solutions as a means of providing continuous data availability and rapid data recovery in the event of a disaster. This course uses a mixture of photos, video clips, and simulations to teach the concepts and tasks required to successfully implement a highly available solution.

DELIVERY TYPE

- Web-based training (WBT)

DURATION

- 7 hours

AUDIENCE

NetApp employees, service partners, and customers who implement active/active controller configurations, SyncMirror, and fabric-attached MetroCluster solutions as a means of providing continuous data availability and rapid data recovery in the event of a disaster.

TRAINING UNITS

- 7

PREREQUISITES

- Data ONTAP® Fundamentals (ILT or WBT)

OBJECTIVES

By the end of this course you should be able to:

- List the high availability solutions available in Data ONTAP 7.3
- Describe an active-active controller configuration and the hardware and software requirements for this high availability solution
- Perform test takeover and giveback functions with a active-active pair
- Describe SyncMirror and how it provides a high availability solution by mirroring data
- Configure SyncMirror on a storage system
- Describe stretch and fabric-attached MetroCluster and how they combine active-active controller configuration and SyncMirror technology for a resilient high availability solution
- Configure stretch MetroCluster and fabric-attached MetroCluster
- Use the NOW (NetApp on the Web)® site to obtain documentation, verify system configuration, and identify proper slot assignments for a high availability solutions

PRICING & CANCELLATION POLICY
