

NETAPP UNIVERSITY

# SnapManager 2.1 for Oracle

## COURSE DESCRIPTION

The video-on-demand (VOD) course covers the new features that were introduced with SnapManager® 2.1, such as credentials and one step cloning. It also highlights the installation and configuration of SnapDrive® for UNIX®, SnapManager for Oracle™ and integration with Oracle RMAN (Recovery Manager). Examples are used throughout the installation and configuration section to show how to install and configure the product. The course also covers typical use cases and best practice considerations for backup, restore, recovery, and cloning of Oracle databases with SnapManager for Oracle on various NetApp® storage types (NFS, blocks) and protocols (NFS, iSCSI, FCP).

The course also shows how SnapManager for Oracle integrates and fully supports various Oracle environments and deployment models such as Oracle ASM (Automatic Storage Management), Oracle RMAN (Recovery Manager), and Oracle RAC (Real Application Cluster)

## DELIVERY TYPE

- Web-based training (WBT)

## DURATION

- 3 hours

## AUDIENCE

System engineers and Global Services professional engineers who are responsible for Oracle on NetApp solutions with SnapManager for Oracle

## TRAINING UNITS

- 3

## PREREQUISITES

- Data ONTAP Fundamentals 7.2
- A basic knowledge about relational database management system (RDBMS), particularly Oracle
- A basic knowledge about transactional application concepts, particularly Oracle

## OBJECTIVES

By the end of this course you should be able to:

- Describe the functionality provided by SnapManager for Oracle
- Describe the value provided by SnapManager for Oracle
- Identify the steps involved in the installation of SnapManager for Oracle
- Identify configurations supported by SnapManager for Oracle
- Identify typical use cases of SnapManager for Oracle

## PRICING & CANCELLATION POLICY
