

NETAPP UNIVERSITY

# SnapDrive for UNIX Operate and Troubleshoot

## COURSE DESCRIPTION

Easily manage your storage in a SAN environment. Through interactive simulations, learn how to start and connect to SnapDrive® for UNIX® services, including the SnapDrive daemon; how to create storage entities; how to create and manage Snapshot™ copies; and how to use the SnapDrive for UNIX diagnostic tool. By the end of this course you will be able to combine your UNIX® skills with NetApp® SnapDrive technology to better manage your storage.

## OBJECTIVES

By the end of this course you should be able to:

- Start and connect to SnapDrive 4.0 services
- Explain how to create storage entities with SnapDrive 4.0 for UNIX
- Create and manage Snapshot copies with SnapDrive 4.0 for UNIX
- Use the SnapDrive for UNIX diagnostic tools and resources

## PRICING & CANCELLATION POLICY

For pricing and cancellation information please check the NetApp University LearningCenter.

**NOTE:** If you are registering for this course with an Authorized Learning Partner, please review their price and cancellation policy.

## DELIVERY TYPE

- Web-based training (WBT)

## DURATION

- 2 hours

## AUDIENCE

This course is intended for customers, NetApp personnel, and partners.

## TRAINING UNITS

- 2

## PREREQUISITES

- Pass the SAN Administration Basics assessment with a score of 80% or better
- Design, implement, and troubleshoot TCP/IP LANs and WANs
- Familiar with storage area networks (SANs)

NetApp creates innovative storage and data management solutions that help you accelerate business breakthroughs and achieve outstanding cost efficiency. Discover our passion for helping companies around the world go further, faster at NetApp.com.
