

NETAPP UNIVERSITY

SnapMirror Disaster Recovery

COURSE DESCRIPTION

Learn how SnapMirror® is an integral component of any NetApp® disaster recovery solution. Using a combination of interactive diagrams, demonstrations, and activities; you will review the software and hardware requirements necessary to implement the three modes of operation, learn how to size a SnapMirror volume, and how to configure the monitor transfer status function. By the end of this course, you will be able to successfully implement SnapMirror as part of your disaster recovery solution.

DELIVERY TYPE

- Web-based training (WBT)

DURATION

- 1 hour

AUDIENCE

This training is for system engineers, administrators, and professional services and support personnel.

TRAINING UNITS

- 1

PREREQUISITES

- NetApp Protection Software Administration (ILT)
- SnapMirror Planning and Implementation (WBT)

OBJECTIVES

By the end of this course you should be able to:

- Explain how SnapMirror technology is used to failover and failback in the event of a disaster
- Explain how to test a disaster recovery solution using the SnapMirror and FlexClone technologies
- Explain how to deploy MetroCluster with SnapMirror to allow high-speed data replication and recovery over a LAN or a WAN
- Describe the differences between SyncMirror® and SnapMirror
- Explain how SnapMirror with SnapManager and SnapDrive provides a complete and efficient data replication and disaster recovery solution for enterprise applications
- Protect SnapVault backups using SnapMirror
- Explain how to deploy SnapVault and SnapMirror for disaster recovery
